

SANIA GHOSH

B.Tech Computer Science & Engineering — 3rd Year
saniaghosh965@gmail.com — GitHub — LinkedIn — West Bengal, India

PROFILE

Third-year B.Tech Computer Science and Engineering student with strong foundations in Data Structures and Algorithms, Object-Oriented Programming, and Data Science. Experienced in building full-stack applications using React and FastAPI, with hands-on knowledge of supervised machine learning, data preprocessing, model evaluation, and Python-based development. Interested in software engineering, machine learning, and AI-driven applications.

EDUCATION

Academy of Technology

B.Tech in Computer Science and Engineering
CGPA through 4th semester

West Bengal, India

CGPA: 8.63

Vision International School

ISC / CISCE – Class XII
ICSE / CISCE – Class X

Uttarpara, West Bengal

96.5%

96%

TECHNICAL SKILLS

Languages: Java, Python, SQL, HTML, CSS, JavaScript, TypeScript

Frameworks & Technologies: React, FastAPI, Tailwind CSS

Databases: MySQL, SQLite

Data Science & Machine Learning: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn; EDA, Feature Engineering, Data Preprocessing, Cross-Validation, Model Evaluation

Tools: Git, GitHub, VS Code, Jupyter Notebook

RELEVANT COURSEWORK

Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Software Engineering

TECHNICAL PROJECTS

ResolveDesk – AI-Powered IT Service Desk Ticket Triage & Auto-Resolution Assistant **GitHub**

- Developed a Python-based AI assistant for automating IT service desk ticket triage and resolution workflows.
- Designed the system to analyze incoming support tickets, identify their category and priority, and assist in routing requests to the appropriate resolution workflow.
- Implemented AI-assisted resolution recommendations and automated handling of repetitive support issues to reduce manual effort and improve response time.

Algerian Forest Fire Prediction – Machine Learning Web Application

GitHub

- Developed a machine learning application to predict the risk of forest fires using meteorological and fire-weather index features such as temperature, relative humidity, wind speed, rainfall, FFMC, DMC, and ISI.
- Performed data preprocessing and feature handling, and trained a **Ridge Regression** model with feature scaling for fire-risk prediction.
- Integrated the trained model into a **Flask** web application, enabling users to enter weather conditions and receive real-time fire-risk predictions.
- Built and deployed the application with a simple web interface for practical use of the trained machine learning model.

ACHIEVEMENTS & CERTIFICATIONS

- Solved **100+ problems on GeeksforGeeks** and **60+ problems on LeetCode**, strengthening problem-solving and Data Structures & Algorithms skills.
- Introduction to Data Science in Python** – University of Michigan, Coursera.
- Complete Data Science, Machine Learning, DL, NLP Bootcamp** – Krish Naik, Udemy.

LEADERSHIP & ACTIVITIES

IEI Students' Chapter, SCCSE – Tech Team Member

- Collaborated with student developers on technical projects and contributed to technology-focused activities within the student chapter.

Hackathons

- Participated in **3x hackathons**, collaborating on technical projects and rapid prototype development.
